OMD: Servicegroups Step by Step

Neue Servicegruppe(n) anlegen

The screenshot displays the Check_MK 1.2.4p5 interface. The left sidebar contains a navigation menu with the following items: Hostgroups (Summary), Services (All services, Favorite services, Recently changed services, Serv. by host groups, Service search), Servicegroups (Servicegroups (Grid), Servicegroups (Summary), Services by group), Business Intelligence (All Aggregations, Hostname Aggregations, Problem Aggregations, Single-Host Aggregations, Single-Host Problems), Problems, Addons (Search Graphs), and Other. The 'Service Groups' item is highlighted with a red box and a circled '1'. The main content area is titled 'Service Groups' and features a 'No Changes' status bar, a 'Main Menu' button, and two buttons: 'New group' (highlighted with a red box and a circled '2') and 'Rules' (highlighted with a red box and a circled '3'). Below these buttons is a table with columns 'Actions' and 'Name'. The table contains one entry: 'sslcerts' with an 'SSL-Certificate Check' icon. An 'Edit service group' dialog box is open in the foreground, showing the 'Properties' section with 'Name' set to 'sslcerts' and 'Alias' set to 'SSL-Certificate Check'. A 'Save' button is visible at the bottom of the dialog.
