

# Nagios Plugins integrieren: mrpe

## Nagios: Viele existierende Plugins

### Pakete in den Distributionen

```
apt-cache search nagios | grep plugin
```

### Nagios-Exchange

<http://exchange.nagios.org/directory/Plugins>

(ca. 3700 Plugins - 04/15)

## Integration in check\_mk in

```
/etc/check_mk/mrpe.cfg
```

## Nagios Plugins integrieren: mrpe

/etc/check\_mk/mrpe.cfg

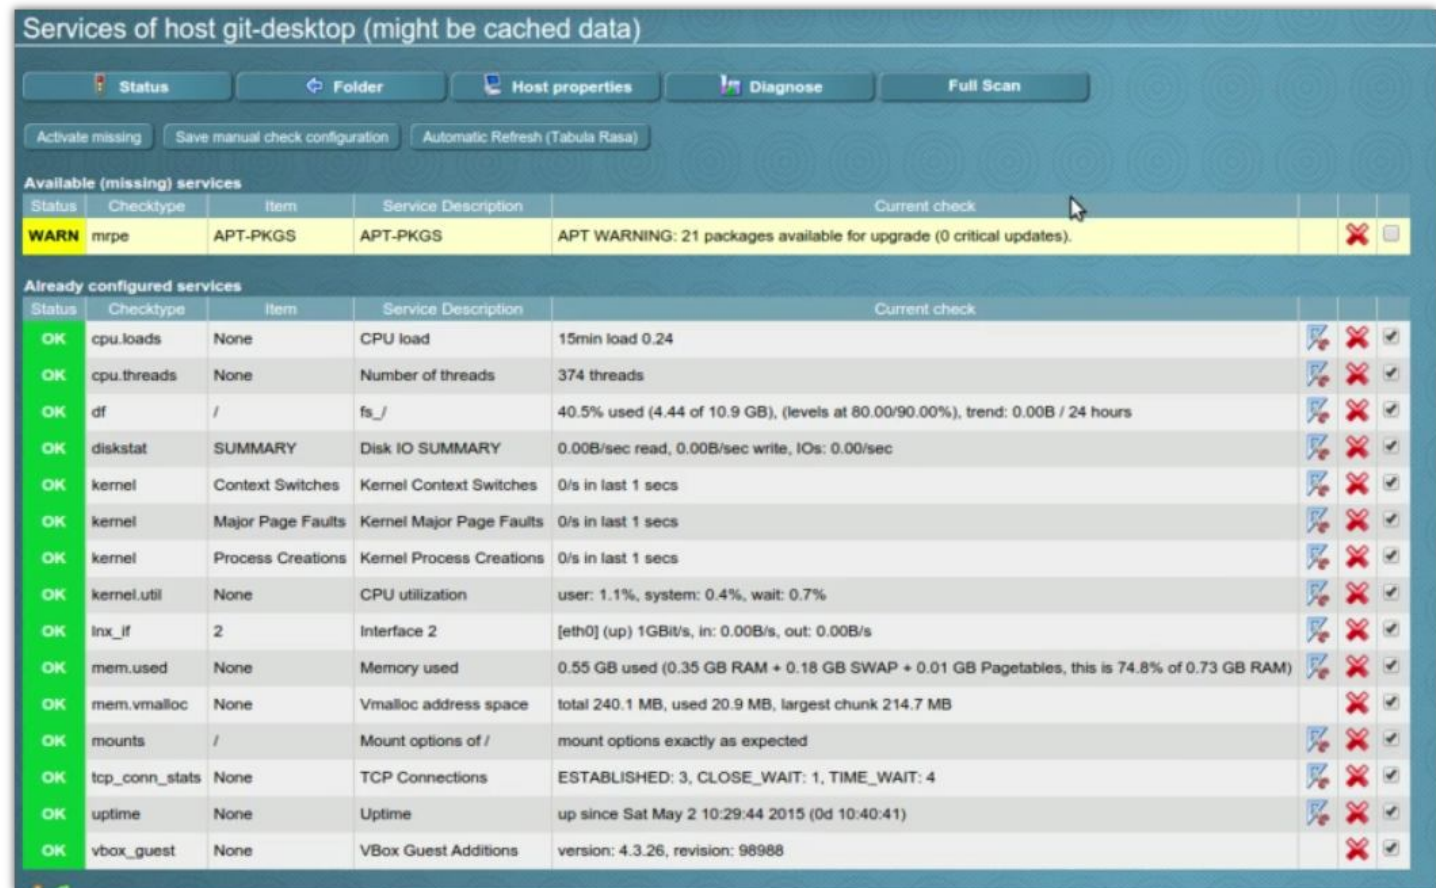

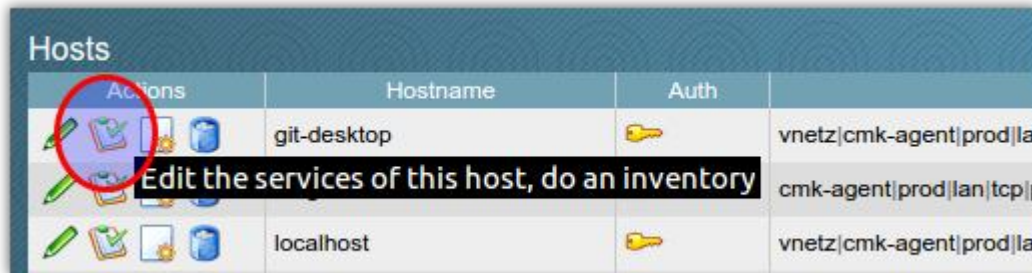

# Name des Checks wie in Nagios - Check Befehl:  
APT-PKG /usr/lib/nagios/plugins/check\_apt

**Testen:** telnet localhost 6556

```
Name: /VirtualBox/GuestInfo/OS/NoLoggedInUsers, value: false
Name: /VirtualBox/GuestAdd/HostVerLastChecked, value: 4.3.26
<<<cups_queues>>>
---
<<<local>>>
<<<mrpe>>>
(check_apt) APT-PKGS 1 APT WARNING: 21 packages available for upgrade (0 critical updates). |available_upgrades=21;;;0 critical_updates=0;;;0
Connection closed by foreign host.
root@Git-Desktop:/etc/check_mk#
```

# Nagios Plugins integrieren: mrpe

Aufnahme in check\_mk/OMD durch Inventarisierung

# mrpe – Übung

Fügen Sie mehrere Nagios  
Plugins via mrpe zu Ihrem  
Desktop Host hinzu.
